

5 Common Tax Processes You Can Automate in One Week

According to McKinsey, an incredible 81 percent of tax processes can be partly or fully automated.

And they should be, to prevent costly fatigue, missed deadlines, fines, and penalties.

Those things add up. In fact, studies show companies pay more than \$10 million a year for exactly the kind of issues that automation prevents. But you don't have to.

In the e-book, find out how to stop paying fines, fees, and the price of human error, by automating these five key processes — and increasing effectiveness per FTE from 30 to 50 percent:

- Tax reconciliation and validation
- Fixed asset depreciation
- Research and development credits
- Sales appointment
- Income tax
